## DIGITAL IMAGES

SPECIFICATIONS	DSLR CAMERA	MOBILE PHONE
<b>Camera</b>	Canon EOS 1200D	iPhone 7 Plus
<b>Softwares</b>	Photoshop	VSCO
<b>Resolution</b>	5184 x 3456	1080 x 1920
<b>Megapixel</b>	18.1mp	Front: 8mp Back: 12.3mp
<b>RAM</b>	64gb Memory RAM	Total: 4gb Available: 3gb
<b>Lithium Battery</b>	Battery is removed and stored in a cool place	N/A iPhone batteries are built in and cannot be removed
<b>CAMERA SETUP</b>	<b>CANON FEATURE (built in)</b>	<b>VSCO CAM</b>
<b>Mode</b>	Tv (shutter priority)	Manual Setup
<b>Shutter Speed</b>	1/50	1/33
<b>ISO</b>	1600	48
<b>White Balance</b>	Auto	Auto
<b>Exposure</b>	+1	-0.1
<b>Aperture</b>	F5.6	F2.8
<b>Focal Length</b>	35mm	6mm
<b>Zoom Factor</b>	3.055mm	10x
<b>Image File</b>	Jpeg	RAW
<b>ADJUSTMENTS</b>	<b>PHOTOSHOP</b>	<b>VSCO EDITOR</b>
<b>Curves</b>		
<b>Curves Evidence</b>		
<b>Crop</b>		

## Knowledge questions

### 1. Identify and explain the key features of the digital camera that impact on the quality of the photographic image

**DSLR** it has a major impact on the quality of the photographic image.

- \*One factor is the resolution; there is a great difference from 18.1mp (DSLR) from 12.3mp (MOBILE).
- \*Another factor is the White Balance feature; although both devices were set to Auto White Balance, the DSLR did a better job on the image.
- \*Last factor is Aperture; DSLR has a better focus property on the image.

**MOBILE** the quality is good, however the camera app (VSCO) exceeded the standard product.

- \*Setting up or controlling ISO was easier because it is very responsive.
- \*(Unrelated to the image) Mobile cameras got a longer Zoom Factor, yet, the quality becomes indeed poor.

### 2. Determine the safety requirements for handling and storing lithium batteries

- \*Should always ensure that batteries are not exposed to any flammable matter.
- \*Do not store batteries in an area that receives direct sunlight.
- \*Should be stored in a cool well-ventilated environment.
- \*Suggest to kept on the original container.

### 3. Explain how to transfer and store images from a camera to a computer list and describe ways that photographic images can be altered or enhanced electronically

#### Transferring and Storing

- \*Personally, I use cables to connect my both of my devices into my computer. Then I locate the images that I need and duplicate it to my machine.
- \*Another way I use is I send it via Gmail to myself then access my Gmail on my computer and save the images. (ONLY on my Mobile Device)
- \*Another way I use (for my DSLR) is taking out the memory card and inserts it into my computer. After that, same process (duplication).

#### Enhancing

- \*Photoshop and Lightroom are my top image enhancing softwares.
- \*Photoshop Operation- The adjustment block has variety of option; In camera, Camera Raw Filter is also one great feature for adjusting.

### 4. Explain why the required delivery mode is important when preparing a photographic image

The required delivery mode is really important when preparing photographic image because it shows that the job is properly done and essential knowledge are proven for the competency.
